Checklist (for Test Benches)

- Safety Valves -
Valve end has/is: Flange
Valve shape:
 Kind of tests have to be done at the safety valve and what is the test medium?
Set pressure tests using Water / Air/Nitrogen (HP)
Seat leakage tests using Water / Air/Nitrogen (HP)
Other tests (please describe)
HP = High Pressure

Test pressures: DN size and the maximum test pressure for exactly this DN size. (you should only indicate DN sizes and test pressures according to your main programme. Exceptions (sizes/pressures) can increase the price of the test bench and its accessories very much!)
